

CLARK COUNTY SCHOOL DISTRICT REGULATION

R-3530

STUDENT TRANSPORTATION

- I. The Clark County School District will provide student transportation to and from school when such transportation serves the major objectives of public education. Two-way student transportation will be provided for regular kindergarten through twelfth grade students who live two miles or more from their assigned school as measured by the District. Special education students will receive District transportation as prescribed on an individual basis.
 - A. It is the intent of the District to provide transportation services as fairly as possible within the limits of practicality and budget resources. In order to provide a clearly defined method of determining walking limits, measurements will be made along dedicated public streets or roads. A dedicated public street or road is a right-of-way for the use and benefit of the public that is controlled and maintained by a government agency.
 - B. The District will cooperate with local government agencies to ensure the safety of students.
- II. Safety of school bus passengers is of primary importance in the student transportation system. Dependable service is necessary to support the District's instructional programs. Economy of operation must be maintained to avoid excessive burden to the District Budget.
- III. Should there be a concern over a transportation issue, members of the community may complete and submit the Clark County School District Public Concern Form (CCF-660) and a response will be made within five working days.
