ACE Meeting will be held at:
C.T. Sewell Elementary School, Parent Cottage
700 East Lake Mead Parkway
Henderson, Nevada 89015

**Regular review helps your child strengthen math skills**

Success in math is built on mastering basic skills. Your child's chances of acing more math test can improve if you do these things:

- **Regularly quiz your child** on basic math facts: 2×9 , $12-4$, $6+6$, etc. Together, make a set of flash cards with the math facts he needs to know. Use them to quiz him – at the breakfast table, in the car or while you wait at the doctor's office. Your child has mastered a math fact when he can give the correct answer in less than three seconds.
- **Resist telling your child** the answers. He will learn better if you show him how to find them instead. For instance, if he doesn't know what 3×5 is, have him draw three parallel horizontal lines. Cross them with five vertical lines. Then have him count the intersections to get the answer.
- **Have your child practice** writing numbers neatly. One quarter of the math errors students make are due to messy number writing. Your child should make sure his numbers are neatly lined up, too.
- **Encourage your child** to work more problems than the teacher assigns. Good math skills come with practice.
- **Challenge your child** to do math "in his head." See if he can figure out a problem without using pencil and paper or a calculator.
