

Think Outside the Classroom

Making connections to science and nature at the museum

Current Exhibits on a Wide Range of Topics

WWW.LVNHM.ORG

Education programs at the Las Vegas Natural History Museum (LVNHM) introduce students and adults to science and the natural world. LVNHM field trips broaden children's knowledge of science, promote firsthand experiences, stimulate interest and motivation, add relevance to classroom learning, and promote personal social development. All our field trips are guided educational programs that are aligned to grade-level standards.
